

Polar Bear – Fascinating Facts

10 Polar bears have a great sense of smell. They can
19 sniff out seals from almost 1km away even when
24 they are under the ice.

32 A fully-grown adult polar bear weighs between
39 175-650kg and measures approximately 2-3
42 metres in length.

52 Polar bears need to hunt earlier each year due to
61 climate change, which is melting the sea ice. This
67 means their feeding season is shorter,
73 giving them less time to build
77 up their fat reserves.

82 This is why polar bears
86 are quickly becoming an
90 endangered species. Try to
96 find out what you could do
102 to help save the polar bears.

Quick Questions

1. How long is an average adult polar bear?

2. Which verb has the author used instead of repeating the word 'smell'?

3. Why is it important for a polar bear to build up its fat reserves?

4. Where could you look to find out about how to help save the polar bears?
