

Bees make honey.

Bees make a buzzing noise.

Bees are yellow and black.

There is a queen bee.

Bees love flowers.

Bees have two pairs of wings and six legs.

Honey bees live in a group around a hive.

They give us sweet honey that is yummy to eat.

It has a body made up of three parts that are very hairy.

It has a very long tongue and little legs.

The buzzing noise is because the bees beat their wings together so fast to fly.

On its legs there are little baskets to collect pollen.

They spread the nectar from plant to plant.

Honey bees build honeycombs in perfect hexagon.

Only female bees have a stinger.

A bees dances in the same shape as a number eight and there is a waggle in the middle.
